The Disability Resource Digest (DRD) is a special project of SMD Alliance. SMD Alliance is based in Manitoba, Canada and provides strategic vision and policy direction to four SMD corporations: SMD Clearinghouse; SMD Foundation; SMD Ventures; and SMD Services.

The vision shared among the corporations is of a "community that supports the independence, participation, and empowerment of persons of all abilities." Each SMD corporation pursues a complementary mandate in working toward this vision.

The DRD is prepared primarily as an informational resource for consumers, professionals and publics interested in remaining current in disability related issues. An archive of past editions of the DRD is maintained on SMD's web site (<http://www.smd.mb.ca>).

Published monthly (with a single summer edition for July and August), the DRD presents summaries of, and URL addresses for, notable disability-related content on the world-wide web (WWW). The DRD focuses on recently posted content but also includes coverage of other web pages of interest. The URL addresses cited in the DRD are current at the time of publication. But as content on the web is continually revised, the addresses in the DRD may not remain current.

The DRD is prepared for SMD Alliance by The Project Group (TPG) Consulting Cooperative Ltd., a Winnipeg-based consulting firm. Neither SMD nor TPG are responsible for the accuracy or reliability of the content cited in the DRD.

Readers interested in learning more about SMD Alliance are invited to visit: <http://www.smd.mb.ca> or to contact the agency by e-mail at info@smd.ca. Readers are also invited to send comments and suggestions regarding the DRD to this same e-mail address.

ACCESSIBILITY

ABLEDATA Fact Sheet on Emergency Alert Systems - (*Abledata*). "Many people with disabilities and seniors are especially concerned about health emergencies and other emergency situations. Seniors may worry about the possibility of a fall, or even a stroke, that can suddenly disable them so that they cannot call for help when they need it most. A person with a physical disability may not be able to get to a telephone, while hearing, speech or other communication disabilities can make it difficult to communicate with emergency personnel. Many of us have heard about buttons that can be worn around a person's neck or wrist and pressed to summon help when the user is unable to reach a phone. These products and others like them, known as emergency alert systems, make it easier to call for help when help is needed."

http://www.abledata.com/abledata_docs/Emergency_Alert_Systems.htm

Disability Advocates Gripe to FCC About iPhone - by Gregg Keizer (*Computerworld*) "A group representing people with a hearing loss filed complaints with the U.S. Federal Communications Commission (FCC) last month, accusing Apple Inc. of not making its iPhone compatible with hearing aids. The Hearing Loss Association of America (HLAA), a Bethesda, Md. advocacy group, filed formal complaints with the FCC in August, Brenda Battat, the HLAA's associate executive director, said in e-mailed comments about Apple's iPhone. 'The phone [is] not usable with a hearing aid, either on the microphone or telecoil setting,' said Battat. 'Clearly it was not designed to be hearing aid compatible. It should have been'."

<http://www.pcworld.com/article/id,137433-c.iphone/article.html>

Facebook excludes disabled users - "Facebook is excluding users with poor vision and reading difficulties from its social network, through recent changes to its accessibility options, according to usability and accessibility specialist Foviance. The online community has removed an accessibility feature that enabled people to verify themselves by mobile phone, instead of by visual CAPTCHA, and replaced it with an audio CAPTCHA that is not visible or keyboard accessible. The move is likely to prevent many disabled communities from accessing Facebook. Visual CAPTCHAs are graphics with distorted or obscured letters or numbers used to determine if a user is human, to prevent spam and automated postings to blogs and communities etc. They cause significant problems for people who are blind, visually impaired or dyslexic."

<http://www.youreable.com/TwoShare/getPage/01News/01Current/October2007/facebook>

Fact Sheet on Ramps and Accessible Thresholds - (*Abledata*). "This Fact Sheet on Ramps and Accessible Thresholds¹ will cover all types of incline devices for traversing raised or lowered levels including portable and permanent ramps for vans, buses, curbs, single or multiple stairs, different building levels, and pools, and telescoping and folding tracks for manual wheelchairs and four-wheeled powered chairs or scooters. Mechanical, hydraulic, or electrically powered lifts and platforms for buildings and vehicles are discussed in separate fact sheets."

http://www.abledata.com/abledata_docs/ramps.htm

Proposed Transportation Accessibility Standards a setback for Ontarians with Disabilities

- "The Ontario Human Rights Commission has made a submission to the Transportation Accessibility Standards Development Committee of the Accessibility Directorate of Ontario. The Committee is charged with developing the *Initial Proposed Transportation Accessibility Standard under the Accessibility for Ontarians with Disabilities Act, 2005* (AODA).

The Commission is concerned that the proposed standard falls short of human rights requirements in a number of significant areas. For example:

- Most of the accessibility requirements for transportation vehicles apply only to new vehicles, leaving barrier removal on existing vehicles to the discretion of transportation providers;
- Transportation providers are permitted to continue to make non-inclusive design choices e.g. they can continue indefinitely to purchase non-accessible second hand buses; and
- The timelines for full accessibility defer equality for persons with disabilities to an unacceptably distant future. For example, in a recent case involving the Toronto Transit Commission, the Human Rights Tribunal found that there was no cost or significant health and safety risk associated with bus and streetcar drivers announcing stops, and ordered the TTC to commence announcements within thirty days of the decision. By contrast, the proposed *Transportation Standard* does not require transportation providers to announce stops until three to eighteen years after the adoption of the standard."

http://www.ohrc.on.ca/en/resources/news/accessibilitystandards/newsrelease_view

Visitability Canada - "We imagine Canada as a country with a vibrant housing sector that constructs attractive, affordable, accessible and sustainable housing to meet the needs of all Canadians. We imagine housing that supports vibrant, socially inclusive communities that are livable at all stages of life. We are working to bring together key people, create dialogue, share information, and collect information to promote this vision and invite you to join us."

<http://www.visitablehousingcanada.com/>

Web 2.0 & Accessibility for Disabled Users - by Kath Moonan (*AbilityNet*). "Web 2.0 has become one of the buzzwords within the internet community. In this article we examine what Web 2.0 is and what implications it might have for disabled people who use the Web, particularly the use of Ajax for interactive web pages."

ADVOCACY

Action Alert: Protect the ADA Restoration Act of 2007 - "The U.S. Chamber of Commerce, the world's largest business federation, in a letter addressed to the Members of the U.S. House of Representatives, went on record as opposing the ADA Restoration Act of 2007 (H.R. 3195) and urging Members not to co-sponsor or show support of the bill. The Chamber's letter mischaracterizes the ADA Restoration Act as an expansion of the ADA, when in fact, it is, as its name suggests, a restoration of the original intent of Congress when passing the ADA in 1990, which was to create a level playing field for everyone who wants a

job to have an equal opportunity to work. Just like other civil rights laws prohibit employers from basing decisions on characteristics like race or sex, Congress wanted the ADA to stop employers from making decisions based on disability. 'Now is the time to react strongly and directly to the Chamber regarding their opposition to ADA Restoration by writing or calling the Chamber of Commerce,' said Marcie Roth, NSCIA Chief Executive Officer."

<http://www.spinalcord.org/news.php?dep=1&page=0&list=1306>

Advocacy 101 - "Web cast sponsored by Boston College, Cash and Counseling National Program Office." This site includes an archive of the web cast, an advocacy manual and several versions of the Power Point slides.

<http://www.ilru.org/html/training/webcasts/archive/2007/09-17-BM.html>

<http://www.ilru.org/Media/2007/ILRU21-07.ram> (Archived web cast).

Disability rights activists storm Chicago - by Bill Massey and Beth Massey (*Party for Socialism and Liberation*). "ADAPT takes direct action to get its point across. From Sept. 8 to 13, ADAPT - the nation's largest direct-action disability rights organization - took action in Chicago. More than 500 ADAPT activists came from around the country for a series of actions that shed light on Illinois' poor disability rights record. They demanded that the state government and the American Medical Association back several key pieces of legislation that would increase access rights for people with disabilities."

http://www.pslweb.org/site/News2?JServSessionIdr007=ne8311f9s1.app1b&page=NewsArticle&id=7343&news_iv_ctrl=1261

October is "Screen for Normality" Month - "Some say October is 'Mental Health Month.' MindFreedom invites you to celebrate your Mad Pride! MindFreedom has renamed this October 'Screen the World for Normality Month!' Here's how you can participate! Get your rubber chicken ready!"

<http://www.mindfreedom.org/campaign/madpride/screen-normality>

UN Treaty Event Spurs Heads of State to Sign UN Disability Rights Convention - "The President of the Republic of Estonia, H. E. Mr. Toomas Hendrik Ilves, was among five distinguished leaders who signed the Convention on the Rights of Persons with Disabilities on September 25, 2007, as part of the UN Treaty Event, held at UN headquarters in New York."

[Back to Contents Page](#)

AGING

Aging, Health, and Public Policy Digital Media Kit – "Aging, Health, and Public Policy: Demographic and Economic Perspectives explores the impact of population aging in the United States. The contents of this supplement are now available online as PDFs."

<http://www.popcouncil.org/mediacenter/DMKAge.html>

Disability and Aging - by D'Vera Cohn, Mark Mather, and Marlene Lee (*Population Reference Bureau*). "The rates of old-age disability have declined in recent decades, and it is expected that Americans will live longer before disability sets in than is true today. The reasons for the

decline in disability are complex, and the promising trend could be countered by the rise in obesity. As the accompanying chart shows, four fifths of 10 elderly Americans were not chronically disabled in 2004-2005, measured by their state of health and the daily tasks they are able to do. That is an improvement over three-quarters a decade earlier. A similar trend has been documented in some Europe countries. Denmark, Finland, Italy, and the Netherlands show clear evidence of a decline in disability among the elderly."

<http://www.prb.org/Articles/2007/DisabilityandAging.aspx>

Trends in Disability at Older Ages - (*Population Reference Bureau*). "The number of people with disabilities and in need of longterm care is expected to grow dramatically as baby boomers reach retirement age and beyond. Currently, the risk of having a disability accelerates after age 80. But in the future, older Americans may spend more years healthy and disability-free than the current population ages 65 and older (Manton, Gu, and Lamb 2006a; Manton, Gu, and Lamb 2006b). The National Institute on Aging (NIA) has sponsored research to project the impact of conflicting trends -declining old-age disability and increasing obesity -on disability rates and health care costs. NIA also supports research on the social and technological changes that could mitigate the effects of chronic health problems on old-age disability rates."

<http://www.prb.org/pdf07/TodaysResearchAging7.pdf>

Today's Research on Aging - (*Population Reference Bureau*). " 'Today's Research on Aging' is an e-newsletter series intended to increase awareness of research results and their application to major public and private decision making. Although policy debates may be closely followed by many members of society, not all people are aware of the research underlying policy prescriptions as well as the choices of public and private decisionmakers. By discussing recent research and the links to major government, business, social, and private issues, we hope to increase appreciation of the scientific findings relevant to aging and their effects on individuals and society."

<http://www.prb.org/TodaysResearch.aspx>

Verizon Awards \$1.5 Million Grant to Expand American Foundation for the Blind's Web Site for Seniors With Age-Related Vision Loss - "The Verizon Foundation today announced a \$1.5 million grant to the American Foundation for the Blind to fund and expand an AFB Web site designed to help aging adults with low vision continue to lead more independent and comfortable lives."

<http://www.afb.org/seniorsite.asp?SectionID=68&TopicID=320>

EDUCATION

English Language Learners with Learning Disabilities - "Featuring bilingual speech-language pathologist Dr. Elsa Cárdenas-Hagan. This webcast discusses effective assessment and instruction strategies for English language learners with learning disabilities, as well as ways to help encourage the active involvement of parents of ELLs with LD in their children's schools.." (Internet Explorer web browser required for viewing).

<http://www.readingrockets.org/webcasts/ondemand/2007>

ELEMENTARY AND SECONDARY

Learning Opportunities For Your Child Through Alternate Assessments - "This booklet introduces parents to the "big ideas" contained in school improvement efforts under NCLB and IDEA, and provides them with the information they need to help ensure that their children can benefit from these efforts. The end of this booklet identifies suggested sources of additional information that parents can use to help their children benefit from the nationwide education reform and accountability efforts intended to ensure high expectations for all children."

<http://www.ed.gov/parents/needs/speced/learning/index.html>

POSTSECONDARY

DO-IT OPENS THE CENTER FOR UNIVERSAL DESIGN IN EDUCATION - "DO-IT has enhanced its AccessCollege resources for postsecondary faculty, staff and students with The Center for Universal Design. Combined with previous areas, all funded by the U.S. Department of Education, AccessCollege is now organized into four resource centers:

- [The Faculty Room](#) - a space for faculty and academic administrators at postsecondary institutions to learn about how to create classroom environments and academic activities that maximize the learning of all students, including those with disabilities.
- [The Conference Room](#) - a space for staff and administrators at postsecondary institutions to learn about how to create facilities, services, and resources that are accessible to all students, including those with disabilities.
- [The Board Room](#) - a space for high-level administrators at postsecondary institutions to learn about how to create and facilitate the development of programs and services that are accessible to all students, including those with disabilities.
- [The Student Lounge](#) - resources to help students with disabilities prepare for and succeed in college.
- [The Center for Universal Design in Education](#) - comprehensive website on principles, processes, guidelines, checklists, and promising practices for applying universal design to instruction, student services, information technology, and physical spaces."

<http://www.washington.edu/doi/Newsflash/nf.09.10.07.html>

Individual Supports To Increase Access To An Inclusive College Experience For

Students With Intellectual Disabilities - "The purpose of this online training module is to provide guidance on developing an Individual Support Model (ISM) to increase access to inclusive college experiences and to improve chances for the success of students with intellectual disabilities."

http://www.education.umd.edu/oco/training/oco_training_modules/IndividualSupports/start.html. (Note: registration required)

EMPLOYMENT

Accommodations and Compliance Series: Employees with Learning Disabilities - by Suzanne Gosden Kitchen, Sarah Dufalla (*Gladnet*). "The Accommodation and Compliance Series is a starting point in the accommodation process and may not address every situation. Accommodations should be made on a case by case basis, considering each employee's individual limitations and accommodation needs. Employers are encouraged to contact JAN to discuss specific situations in more detail."
<http://digitalcommons.ilr.cornell.edu/gladnetcollect/287/>

Governor's Committee on Employment of People with Disabilities – "The California Governor's Committee on Employment of People with Disabilities (Governor's Committee) is responsible for providing leadership to increase the number of people with disabilities in the California workforce. The Governor's Committee is also responsible for implementing California's Workforce Inclusion Act, Assembly Bill 925, which names and empowers the Governor's Committee to undertake activities to ensure improved employment opportunities for people with disabilities. The Governor's Committee provides a forum through which key State departments, boards and councils, local service providers, business leaders and the disability community can collaborate to develop a comprehensive strategy (DOC) that will result in an increased rate of employment for people with disabilities."
<http://www.edd.ca.gov/qcepdind.asp>

2006 Annual Report on The Employment Status of Californians with Disabilities – "This is the third report on *The Employment Status of Californians with Disabilities* (Annual Report) to the Governor and the Legislature as mandated by Assembly Bill (AB) 925, the Workforce Inclusion Act, 2002.2 Its purpose is twofold. First, the report transmits the *California Comprehensive Strategy for the Employment of People with Disabilities* to the Governor and the Legislature. . . . Secondly, it informs the Governor and the Legislature on the employment status of Californians with disabilities and activities undertaken by the California Governor's Committee on Employment of People with Disabilities (Governor's Committee), pursuant to AB 925."
<http://www.edd.ca.gov/qcepd2006report.pdf>

Is it acceptable to pet the guide dog of an individual who is blind? – "Is it okay to grab a chair to sit at the same eye level when conversing with a person who uses a wheelchair? Is it appropriate in all cases to exchange hand-written notes in order to communicate with a person who is Deaf? Answers to these and many other questions about successful interaction with individuals with a variety of physical and mental conditions can be found in the United Spinal Association pamphlet *Disability Etiquette*. This useful publication is offered as part of United Spinal's celebration during October of National Disability Employment Awareness Month, spearheaded by the U.S. Department of Labor. Sensitivity toward customers with disabilities makes good business sense, and it makes employees with disabilities feel more welcome and be more productive in the workplace."
http://www.abilitymagazine.com/news_etiquette.html

National Disability Employment Awareness Month, 2007 - "National Disability Employment Awareness Month is an opportunity to recognize the contributions and accomplishments of

Americans with disabilities and to underscore our Nation's commitment to advancing employment opportunities for all our citizens."

<http://www.whitehouse.gov/news/releases/2007/09/20070929-3.html>

National Disability Employment Awareness Month, 2007: A Proclamation by the President of the United States of America - "National Disability Employment Awareness Month is an opportunity to recognize the contributions and accomplishments of Americans with disabilities and to underscore our Nation's commitment to advancing employment opportunities for all our citizens."

<http://www.whitehouse.gov/news/releases/2007/09/20070929-3.html>

"Workers with Disabilities: Talent for a Winning Team" - "Throughout October, which is National Disability Employment Awareness Month, the Office of Disability Employment Policy will profile on its Web site individuals who have personally benefited from agency-sponsored programs aimed at eliminating the chronic underemployment of people with disabilities, as well as employers and organizations that have successfully implemented strategies to hire, support, empower and otherwise value employees with disabilities."

<http://www.dol.gov/odep/>

<http://www.dol.gov/odep/talent/index.htm> (link to profiles)

[Back to Contents Page](#)

GENERAL INTEREST

An old word for a growing problem - by Tom Shakespeare (*Ouch*). "In recent months, a series of deeply disturbing stories have hit the media. In each case, a vulnerable and lonely person is befriended and exploited by a group of people who proceed to torture him to death. The common feature of these horrific crimes was that the victim was disabled. I admit, I was sceptical about the concept of hate crime against disabled people when it first began to be discussed a few years back. The research evidence was very scant, and I felt that the term 'hate crime' was over-dramatic and risked creating unnecessary fear among disabled people."

http://www.bbc.co.uk/ouch/columnists/tom/240907_index.shtml

Learning to live without sight - (*Toronto Star*). "It's a program the sighted world rarely sees. Photographer Tory Zimmerman documents a CNIB course that teaches the blind the skills needed to live a more independent life."

<http://www.thestar.com/videosearch?q=cnib&OrderBy=sReleaseDate%20DESC>

NIDMAR protocol comes to New Zealand - "Since 1974, New Zealanders have been enjoying the most unique and comprehensive insurance coverage in the world. After a Royal Commission looked into the impact of accidents on community members, the Accident Compensation Corporation (ACC) was established at that time as a Crown corporation to run New Zealand's accident compensation program - one that provides 24-hour, 7-days-a-week, no-fault personal injury insurance coverage. Now ACC has new tools to better deliver

its exceptional coverage. It has adopted the full NIDMAR disability management protocol: the audit tool, professional certifications and the educational curriculum."

http://www.nidmar.ca/news/news_articles/IDMSC%20Newsletter%20Vol%201%20No%204%20ACC%20New%20Zealand%20September%202007.pdf

Turner barred 2 years from wheelchair basketball - "Donald Turner is the second Canadian wheelchair basketball athlete in a week to be suspended, barred two years on Tuesday after testing positive for cocaine. Turner failed a doping test May 20 at the national championships in Winnipeg, according to the Canadian Centre for Ethics in Sport. Winnipeg's Shawn Watson, another wheelchair basketball player, was also suspended two years for a positive cocaine test while participating in the same event."
<http://www.cbc.ca/sports/amateur/story/2007/09/04/turner-doping.html>

'With independence comes responsibility' Having left home, a survivor adjusts to his new life - by Crocker Stephenson (*JS Online*). "He was the boy who was not supposed to live. But the boy, whose birth spurred debate over the rights of parents and of society to care for a child born with severe abnormalities, not only lived, but grew up and became a man. He graduated from high school, found an apartment, moved away from his mother's home."
<http://www.jsonline.com/story/index.aspx?id=662635>

Words Unspoken Are Rendered on War's Faces - by Holland Cotter (*NewYorkTimes*). "One of the more shocking photographs to emerge from the current Iraq war was taken last year in a rural farm town in the American Midwest. It's a studio portrait by the New York photographer Nina Berman of a young Illinois couple on their wedding day. The bride, Renee Kline, 21, is dressed in a traditional white gown and holds a bouquet of scarlet flowers. The groom, Ty Ziegel, 24, a former Marine sergeant, wears his dress uniform, decorated with combat medals, including a Purple Heart. Her expression is unsmiling, maybe grave. His, as he looks toward her, is hard to read: his dead-white face is all but featureless, with no nose and no chin, as blank as a pullover mask."
<http://www.aapd.com/News/veterans/070822nyt.htm>

Wounded Vets Also Economic Casualties - by Jeff Donn And Kimberly Hefling (*Associated Press*). "He was one of America's first defenders on Sept. 11, 2001, a Marine who pulled burned bodies from the ruins of the Pentagon. He saw more horrors in Kuwait and Iraq. Today, he can't keep a job, pay his bills, or chase thoughts of suicide from his tortured brain. In a few weeks, he may lose his house, too. Gamal Awad, the American son of a Sudanese immigrant, exemplifies an emerging group of war veterans: the economic casualties."
<http://ap.google.com/article/ALegM5jxpd48oRKz6YdYtZkky-eXhZHT3qD8RV8TR02>

GOVERNMENT

CANADA

Disability Offices Office Annual Report: 2006-2007 - (*Province of Manitoba*). "The Annual Report of the Disabilities Issues Office is organized to present developments under our primary mission. It includes information about community consultations, improvements to government services, community networking, and significant issues that affect people with disabilities. The report also contains information about the DIO's organization and expenditures. This report is available in multiple formats on request."
http://www.gov.mb.ca/dio/pub/dio_annual-report2006-07.pdf

U.S.

The President's New Freedom Initiative: The 2007 Progress Report - "Announced in February, 2001, the New Freedom Initiative is President George W. Bush's plan to tear down barriers to full integration into American life that remain for many of the 54 million Americans with disabilities. This report highlights the many accomplishments of the Administration in implementing the President's vision and builds upon the reports issued in May 2002 and May 2004."
<http://www.whitehouse.gov/infocus/newfreedom/newfreedom-report-2007.html>

[Back to Contents Page](#)

HEALTH/WELLNESS

People with disabilities – removing the barriers to health and well-being - (*Canadian Health Network*). " 'I'm a healthy person. My disability really doesn't have an impact on my health.' By her own assessment, Heidi Hellsten, a Winnipeg woman who has spina bifida is one of the relatively few Canadians with disability who consider themselves to be in excellent health. In fact, when people with disability were asked in a national health survey to rate their own health, only 8.1% reported a high degree of well-being, compared to 36.3% of Canadians without disabilities."
<http://tinyurl.com/yw5as5> (article and podcast)

Frontline Health Care in Canada: Innovations in Delivering Services to Vulnerable Populations - by David Hay, Judi Varga-Toth, Emily Hines (*CPRN*). "AstraZeneca Canada commissioned Canadian Policy Research Networks to conduct research and prepare a report on 'frontline health' in Canada. The purpose of the report was 1) to better understand the nature of populations in Canada who are unserved or underserved by the mainstream health care system, in particular people in rural and remote communities, people living in the inner city, and people living in conditions of poverty and low income; 2) to explore and describe the nature of frontline health services; and 3) to describe the public policy environment in which patients and providers on the margins have been operating." The focus of this report is not on people with disabilities; however they do note that 'rural populations' may have specific health vulnerabilities, poorer health status, lower life expectancy, higher accident and injury rates, and higher levels of disability.
http://www.cprn.org/documents/45652_en.pdf

New Handbook Empowers Women with Disabilities to Take Charge of Their Health - by Melissa Mitchell (*Mobility International USA*). "The latest book from the [Hesperian Foundation](#), [A Health Handbook for Women with Disabilities](#) , provides women with disabilities practical tools and information they need to live healthy lives. The handbook, created in a collaborative writing process including contributions from 24 alumni of the [Women's Institute on Leadership and Disability \(WILD\)](#), discusses many important health topics for women with disabilities using easy to read language, clear black and white pictures, and stories from real women with disabilities. . . . In order to provide women with disabilities access to the vital information in A Health Handbook for Women with Disabilities, the Hesperian Foundation offers their books at a variety of price levels, as well as a [free chapter by chapter downloadable version](#)." <http://www.miusa.org/newsitems/new-handbook-empowers-women-with-disabilities-to-take-charge-of-their-health>

LEGAL

Does ADA Apply in Cyberspace? - "Today the National Law Journal is examining the question: Does the Americans with Disabilities Act (ADA) apply in cyberspace? According to the U.S. Department of Justice and the presidentially appointed National Council on Disability, it does. They have said repeatedly that ADA covers accessibility of commercial web sites for people with disabilities. And many companies are responding." http://www.afb.org/blog/blog_comments.asp?TopicID=3110

MEDICAL

Chronic Fatigue No Longer Seen as 'Yuppie Flu' - by David Tuller (*New York Times*). "For decades, people suffering from chronic fatigue syndrome have struggled to convince doctors, employers, friends and even family members that they were not imagining their debilitating symptoms. Skeptics called the illness 'yuppie flu' and 'shirker syndrome.' But the syndrome is now finally gaining some official respect. The Centers for Disease Control and Prevention, which in 1999 acknowledged that it had diverted millions of dollars allocated by Congress for chronic fatigue syndrome research to other programs, has released studies that linked the condition to genetic mutations and abnormalities in gene expression involved

in key physiological processes. The centers have also sponsored a \$6 million public awareness campaign about the illness. And last month, the C.D.C. released survey data suggesting that the prevalence of the syndrome is far higher than previously thought, although these findings have stirred controversy among patients and scientists."

http://www.nytimes.com/2007/07/17/science/17fatigue.html?_r=4&ref=science&oref=slogin&oref=slogin&oref=slogin&oref=slogin (Note: registration required)

POLICY/RESEARCH

The Business of Employing People with Disabilities: Four Case Studies - "The retirement of the baby-boom generation presents society with many challenges, including projected labor supply shortages in certain professions. Recently, emphasis has been placed on examining ways to harness the productive capability of those populations that historically have been excluded or underemployed. The unemployment rate among people with disabilities hovers somewhere around 70%. There are many reasons for this; however, one of the most prominent is the belief that there are significant economic costs to employing people with disabilities, without requisite benefits in terms of productivity. Research in the economics of disability and employment has focused on analyses of income support, health insurance, and accommodations at the level of the labor market. There is a gap in academic research on decision-making processes of employers of people with disabilities. There is an equivalent lack of integration of disability issues in business case studies. Through analysis of in-depth interviews and documentary evidence of four firms (Sears, Aon, Data Armor, and Arrow Messenger), this project will delineate strategies that work for successful employment of people with disabilities."

<http://www.dri.uiuc.edu/research/p05-09s/default.htm>

Contracting social services a risky bet - by Jody Paterson (*Times Colonist*). "For better or worse, the bulk of B.C.'s back-to-work programs for people with disabilities are now under the control of a large, aggressive American corporation. The ink is barely dry on the Aug. 3 agreement that saw the sale of the local company that has run the programs up until now -- WCG International -- to Arizona's Providence Service Corp. So it's much too soon to speculate whether clients will notice any difference, or to assume that it's automatically a bad thing when one more big U.S. company takes over yet another aspect of B.C.'s human services."

<http://www.canada.com/victoriatimescolonist/news/story.html?id=6fe9e1d8-dd8a-4fa5-89bc-a91c8a60225e>

Council of Canadians with Disabilities Annual Report - "This past year has been one of new beginnings. Following the election of a Conservative minority government in January 2006 much of CCD's work has been to develop new working relationships with new Ministers and their political staff. In some instances this work has been relatively easy and we have found some new champions of our issues and in other instances we appear to be making no progress. The main achievements of the past year include more recognition and focus on disability issues within Federal Budget 2007 than we have probably seen in a decade."

<http://www.ccdonline.ca/about-us/annual-reports/2007.html>

The Future of Disability in America - "The future of disability in America will depend on how well this country prepares for and manages the demographic, fiscal, and technological developments that will unfold during the next two to three decades. Building upon two prior studies from the Institute of Medicine (the 1991 Institute of Medicine's report *Disability in America* and the 1997 report *Enabling America*), *The Future of Disability in America* examines both progress and concerns about continuing barriers that limit the independence, productivity, and participation in community life of people with disabilities. This book offers a comprehensive look at a wide range of issues, including the prevalence of disability across the lifespan; disability trends; the role of assistive technology; barriers posed by health care and other facilities with inaccessible buildings, equipment, and information formats; the needs of young people moving from pediatric to adult health care and of adults experiencing premature aging and secondary health problems; selected issues in health care financing (e.g., risk adjusting payments to health plans, coverage of assistive technology); and the organizing and financing of disability-related research." (This book can be read online. Individual chapters and/or the entire book can be purchased in pdf or hardcover format) http://books.nap.edu/catalog.php?record_id=11898#description

Guiding Principles for the Diagnosis and Treatment of Attention Deficit/ Hyperactivity Disorder - (*ADDA*). "Over the past two decades there has been an exponential increase of diagnosis and treatment research regarding Attention Deficit/ Hyperactivity Disorder (AD/HD), sometimes referred to as Attention Deficit Disorder (ADD). As clinicians and researchers have gained more experience working with AD/HD, it has become clearer that its impact on life is far greater than we had ever appreciated. AD/HD not only interferes with learning and behavior control in childhood, but, as a critical neurobehavioral condition, it can also profoundly compromise functioning in multiple areas throughout the life span. Research and clinical experience suggest that AD/HD difficulties can lead to significant educational, occupational, and family dysfunction and can be a significant contributor to a variety of health, social, and economic problems." <http://www.add.org/pdf/GuidingPrinciples021206Rev%5B1%5D.pdf>

Study sees ADHD being underdiagnosed - by Jo Ciavaglia (*Intelligencer*). "In the last decade, [Attention Deficit Hyperactivity Disorder](#) has gained recognition as a chronic medical condition, but a new study suggests it's more widespread and underdiagnosed than previously believed. An estimated 2.4 million American children meet the criteria for the disorder, but fewer than half are being treated for it, according the study appearing in the September issue of the [Archives of Pediatrics & Adolescent Medicine](#), an [American Medical Association](#) journal." <http://www.phillyburbs.com/pb-dyn/news/113-09042007-1401953.html>

Leadership in the Canadian Consumer Disability Movement: Hopes and Challenges - by Peggy Hutchison, Susan Arai, Alison Pedlar, John Lord and Colleen Whyte (*IJDCR [International Journal of Disability, Community and Rehabilitation]*). "Non-profit organizations play an important role in Canadian society (Torjman, 1997). In the non-profit sector, national and provincial disability organizations have been credited with changes related to rights, equity, access, and inclusion of people with disabilities (Neufeldt & Enns, 2003). Disability organizations have had a long history of advocating for societal change related to people with disabilities (Stienstra & Wight-Felske, 2003). Neufeldt (2003) identifies three waves in

the history of disability advocacy in Canada. The first wave, from the mid to late 19th century involved mostly professional advocacy that included the development of schools and institutions. The second wave after World War II was closely intertwined with the development of community services and rehabilitation and the growth of national advocacy organizations. Consumer oriented groups such as the Canadian Paraplegic Association began in 1945 to fight for war veterans' benefits and conditions; and parent driven groups began to appear in the late 1940s to advocate for their children with disabilities. The third wave, the disability rights movement, saw the emergence of a variety of impairment specific organizations, as well as disabled people's organizations or consumer organizations." http://www.ijdcr.ca/VOL06_01_CAN/articles/hutchison.shtml

The politics of sexual citizenship: commercial sex and disability - by Teela Sanders (*Journal of Disability & Society*). "This paper breaks a long silence by bringing together two areas of literature that have generally been considered separately: that of sexuality and disability with findings from studies on sex work. Presenting empirical findings from two studies, one with sex workers who work from indoor sex markets and the other with men who buy sex, this paper exposes the existing relationships and practices between men with physical and sensory impairments who seek out commercial sexual services from female sex workers. In the discussion the politics surrounding sexual rights and commercial sex will be addressed. In the context of commercial sex, quality of life issues, complex power dynamics and the common ground between disabled people and sex workers rights are discussed. This paper considers the negative aspects of promoting commercial sex for people with impairments, as well as the positive aspects regarding the wider campaign for sexual citizenship. Finally, I set out recommendations and a new research and policy agenda that investigates the complexities of commercial and facilitated sex." <http://www.informaworld.com/smpp/content?content=10.1080/09687590701427479>

Priority Issues for British Columbians Living with Spinal Cord Injury - by Catherine Backman, Susan Forwell and Lyn Jongbloed (*IJDCR*). "The British Columbia Paraplegic Association wished to ascertain the needs and expectations of its constituents in order to guide the organization's future advocacy and rehabilitation activities. This study identifies the priority needs of individuals with spinal cord injury living in communities in British Columbia. A questionnaire was designed in consultation with an advisory committee and people with SCI, based on results from an earlier focus group study. All 12 community service needs surveyed were endorsed by varying proportions of the 357 respondents. The three most frequently cited priorities were to lobby for better home support services (endorsed by 43%), lobby for equitable income policies (38%), and educate employers (34%). Priorities differed based on gender, years living with SCI, functional classification, household income, employment status and vehicle ownership. The priorities identified by study respondents may be shared by others with disabilities and need to be addressed by advocacy organizations and service providers." http://www.ijdcr.ca/VOL06_01_CAN/articles/backman.shtml

Spina Bifida Advocacy - A Case Study In Public Policy Success - by Cindy Brownstein, Ilisa Halpern Paul, and Anne House Quinn (*The Scientific World Journal*). "Advocacy. Public policy. Politics. Congress and the Administration. Given recent events, these words often cause people to groan, roll their eyes, tune-out, or launch into a litany of complaints about

the government. While each of these responses is understandable, the Spina Bifida Association (SBA) maintains a steadfast commitment to working with individuals, families, physicians, nurses, and other caregivers to channel their sense of frustration with government, public policy, and regulations into positive change for the Spina Bifida community. SBA engages in health policy advocacy to help fulfill its mission and achieve its goals and objectives as an organization to enhance the lives of those with Spina Bifida and those whose lives are touched by this challenging birth defect. To that end, SBA seeks local, state, federal support for policies and programs that reduce and prevent suffering from Spina Bifida."

REHABILITATION

Inclusion of Minorities in Traumatic Brain Injury Rehabilitation and Outcomes Research:

Special Issues - "This presentation will begin with an overall introduction to the work of the Rehabilitation and Training Center (RRTC) on Community Integration of Persons with Traumatic Brain Injury (TBI). This will be followed by a general overview of the importance of health disparities research and the need for cultural competence in conducting research in the area of TBI. The majority of the presentation will be focused on special issues involved in conducting research with diverse racial/ethnic populations. Topics covered will include obtaining informed consent, building rapport, retaining participants in longitudinal and clinical trials studies, and sensitivity of outcome measures. A recent clinical trial conducted by Center staff will be discussed to illustrate these concepts. Additionally, an ongoing project on diversity in community integration needs will be discussed to highlight the need for sensitive outcome measures."

<http://www.ilru.org/Media/2007/ILRU20-07.ram> (Archived web cast).

Knowledge Translation: Introduction to Models, Strategies, and Measures - by Pimjai Sudsawad, ScD (*NCDDR*). "This document provides an overview of the new field of Knowledge Translation (KT) in relation to dissemination and utilization literature. It is not intended to be an in-depth review of any one aspect of knowledge translation, but is designed to bring together several aspects of KT from selected literature for the purpose of raising awareness, connecting thoughts and perspectives, and stimulating ideas and questions for future research of this area of inquiry in rehabilitation."

Motivational Interviewing: A Client-Centered Approach to Health Promotion – "Promoting physical activity, healthy eating, and other healthful lifestyle behaviors is not always the easiest thing to sell to our clients. No doubt, we are passionate professionals who truly believe in what we are preaching but at times that passion can lead to an authoritarian approach to the advice that we deliver. Rather than selling, preaching, or dictating the change that must take place, we can empower and engage our clients to set their own

agenda for change and in doing so, allow them to work through their ambivalence to change and explore their own strategies for overcoming barriers. To learn how to roll with resistance and elicit change talk read this month's FITT column."

http://www.ncpad.org/fitt/fact_sheet.php?sheet=564&PHPSESSID=6add0a5bec2ea0797bac5687b0a8bc19

Occupational Therapists Trained in Baby Care Assessment - "In January 2007, ten occupational therapists (OTs) from various sites associated with the Rehabilitation Institute of Chicago attended a two day training seminar in Chicago by TLG's Christi Tuleja, MS OTR, concerning administering TLG's Baby Care Assessment tool. This tool was developed under a grant from NIDRR, U.S. Department of Education, and was based on TLG's 14 years of clinical experiences as well as a series of previously funded NIDRR grants regarding adaptive baby care equipment. The Chicago group of OTs was the first to be trained since the tool was completed in January 2006."

<http://lookingglass.org/babycare/index.php>

Scope of Practice for Rehabilitation Counseling - by Commission on Rehabilitation Counselor Certification (*Gladnet*). "The Scope of Practice Statement identifies knowledge and skills required for the provision of effective rehabilitation counseling services to persons with physical, mental, developmental, cognitive, and emotional disabilities as embodied in the standards of the profession's credentialing organizations."

<http://digitalcommons.ilr.cornell.edu/gladnetcollect/298/>

What Do You Need? - by Tor Valenza (*Rehab Pub*). "Go to any rehabilitation trade show, and there will be a candy store of continuous passive motion (CPM) units, trampolines, and elliptical machines from which to choose. Brian Ito, PT and system director of rehabilitation services at the Centinela Campus of Freeman Regional Medical Center, Los Angeles, shares his perspective for choosing the right exercise equipment for his facility and his patients. The joy of shopping can lend itself to therapists searching for replacements of old exercise equipment or planning for the opening of a new facility. Walking through a trade show, or flipping through catalogs, or even Rehab Management's product directory, can present an overwhelming smorgasbord of strength and conditioning machines, treadmills, CPMs, and Pilates tables, not to mention low-tech balls, bands, and free weights. But just as one cannot buy the whole candy store, therapists are limited by budgets and space to choose a narrow selection. To pare down the exercise equipment wish list down, therapists can asks one simple question: What do you need?"

SELF-HELP

Guide Dogs, Hearing Dogs, Support Dogs, Service Dogs, Companion Dogs - "This page will provide you with just about everything and anything you'd need to know if you are interested in a Service Dog for yourself or someone you know that has a disability, that by having a service/companion, or other trained dog, would change yours or their lives for the

better. This page went on line mid-February 2007 and will up-dated weekly. Go for it! I myself have a service dog in training 04.01.07"

<http://www.paralinks.net/paralinksarchives/707caninecompanionsiwastudent.html>

NFB Starts New Forum for Blind Wheelchair Users - "The National Federation of the Blind (NFB) has launched Blind Rollers, an online forum for discussing issues relating to blind people who have mobility disabilities. The forum addresses the needs of blind people who require a wheelchair all or part of the time or have trouble walking."

<http://www.abledata.com/abledata.cfm?ksectionid=160164&pageid=85474&newsid=185711>

<http://www.nfbnet.org/mailman/listinfo/blind-rollers>

Spinal Cord Injury Information Pages - "This site is a free and informative resource for those living with a spinal cord injury or other disabling injuries or diseases of the spine. It is meant to be a 'best of the web' site for SCI health and caregiver information. Visit regularly for updated resources, new features, links and more. If you know of something that should be added such as links, news, clinical trials, pictures, etc., please contact me."

<http://www.sci-info-pages.com/>

World Spine Society: Spine Resources - "Spinal paralysis is a significant health problem worldwide and requires multi-disciplinary management. As a service to the multi-national medical community providing care to people with spinal paralysis, the World Spine Society is creating a comprehensive resource center to improve access to information for professionals as well as consumers. This information will range from acute medical and surgical management of spinal trauma to the long-term management of chronic paralysis and associated medical conditions. In addition, guidelines for human spinal injury research will be provided." The information provided on this site is extensive and is organized in three categories: [Medical Professionals](#), [Consumers](#), and [Research](#).

TECHNOLOGY

Opening Doors: Technology and Communication Options for Children with Hearing Loss

- "Parents of children with hearing loss can find helpful information and resources in a publication produced for the Office of Special Education and Rehabilitative Services (OSERS) by the Academy for Educational Development (AED). Opening Doors: Technology and Communication Options for Children with Hearing Loss provides background on early intervention, the use of technology and other support available to children and their families."

http://www.ed.gov/about/offices/list/osers/products/opening_doors/index.html

Technique links words to signing - "Technology that translates spoken or written words into British Sign Language (BSL) has been developed by researchers at IBM. The system, called SiSi (Say It Sign It) was created by a group of students in the UK. SiSi will enable deaf people to have simultaneous sign language interpretations of meetings and presentations. It uses speech recognition to animate a digital character or avatar. IBM says its technology will

allow for interpretation in situations where a human interpreter is not available. It could also be used to provide automatic signing for television, radio and telephone calls."

<http://www.youreable.com/TwoShare/getPage/01News/01Current/September2007/sign%20anguage>

Try the first symbol-supported web browser - "Communicate: Webwide from Widgit software, bills itself as 'first symbol-supported web browser' and is intended to turn websites into different levels of picture supported text with full speech support if needed.

Communicate: Webwide is a subscription-based service which gives users a flexible means of accessing information online. It will help any reader who has difficulty accessing the text in standard English language web pages."

CONFERENCES

New Conferences)

CANADIAN

24th International Seating Symposium - March 5-8, 2008 | Vancouver, British Columbia.

"This international symposium addresses current and future developments in the areas of seating, positioning and mobility. Topic areas include service delivery, product development, research and evaluation. The format for the symposium will include plenary, poster, instructional and paper sessions. Extensive opportunities are provided for networking with colleagues."

http://www.interprofessional.ubc.ca/24th_Seating.htm

CHHA - IFHOH, Congress 2008 - July 2-6, 2008 | Vancouver, British Columbia. "The Canadian Hard of Hearing Association and the International Federation of Hard of Hearing People invite you to attend the International Congress for persons with hearing loss to be held in Canada at the fabulous Sheraton Vancouver Wall Center in downtown Vancouver.

Programs will be of interest to all persons with hearing loss, and to those who live, work and are part of the lives of persons with hearing loss. This Congress is a 'must' if hearing loss has touched your life."

<http://www.chha-ifhohcongress2008.com/>

 **Vision 2008, the 9th International Conference on Low Vision** - July 7-11, 2008 | Montreal, Quebec. "In 2008, the 9th International Conference on Low Vision will be held from July 7 to 11 in Montréal, one of Canada's major cities. The Institut Nazareth & Louis-Braille (A Rehabilitation Centre specialized in visual impairment) and the University of Montréal's School of Optometry will oversee the organization of this Conference in partnership with the CNIB (Canadian National Institute for the Blind) under the auspices of the International Society for Low Vision Research and Rehabilitation (ISLRR)."

U.S.

10th Annual Accessing Higher Ground: Accessible Media, Web and Technology

Conference for Education, for Businesses, for Web and Media Designers - November 6- 9, 2007 | Boulder, Colorado. "Accessing Higher Ground focuses on the implementation and benefits of Assistive Technology in the university and college setting for sensory, physical and learning disabilities. Other topics include legal and policy issues, including ADA and 508 compliance, and making campus media and information resources - including Web pages and library resources - accessible."
<http://www.colorado.edu/ATconference/>

8th annual Technology Innovators Conference: Bright Ideas. Real Solutions - November 15-16, 2007 | Washington, D.C. "This forum brings together thought leaders, innovators, and entrepreneurs engaged in enhancing educational technology. Be a part of the search for real solutions for students with leaders from technology companies, industry, academia, public policymakers, government officials, and the media."
<http://www.nationaltechcenter.org/index.php/events-main-page/annual-technology-conference2007/>

World of Possibilities Expo Virginia 2007 - December 7-8, 2007 | Richmond, Virginia. "World Of Possibilities Expos focus on Abilities, Healthy Aging and Independent Living and are dedicated to improving the lives of children and adults with disabilities, seniors, their families and caregivers, as well as health care and education professionals."
<http://expo.caringcommunities.org/>

23rd Annual International Technology and Persons with Disabilities Conference - March 10-15, 2008 | Los Angeles, California. "The 23rd Annual International Technology and Persons with Disabilities Conference invites submissions of papers for this conference to be held March 10-15, 2008 at the Los Angeles Airport Marriott and Renaissance Montura hotels. The 'CSUN' conference is the world's longest-running and largest conference of its kind on the topic of assistive technology and the positive impact on persons with disabilities. The conference draws more than 4,500 persons annually who attend sessions, visit the exhibit halls, and participate in affiliate meetings and informal gatherings."
<http://www.csun.edu/cod/conf/index.html>

5th Annual International Conference for Positive Behavior Support - March 27-29, 2008 | Chicago, Illinois. "The 5th International Conference on Positive Behavior Support is an international conference dedicated to promoting research-based strategies that combine applied behavior analysis and biomedical science with person-centered values and systems change to increase quality of life and decrease problem behaviors. The Association of Positive Behavior Support (APBS) is made up of professionals, family members, trainers, consumers, researchers, and administrators who are involved and interested in positive behavior support."
<http://www.apbs.org/conference/chicago/default.html>

2008 Mobility Planning Services Institute - April 21-24, 2008 | Washington, D.C. "The 2008 Mobility Planning Services (MPS) Institute will take place from April 21-24, 2008 in

Washington, D.C. MPS brings together community teams of leaders from the disability world and transportation industry to share information and strategies to improve access to transportation services in their communities."

http://projectaction.easterseals.com/site/PageServer?pagename=ESPA_mobility_planning

Multiple Perspectives on Access, Inclusion, & Disability: Looking Back & Thinking Ahead

- April 22-23, 2008 | Columbus, Ohio. "The Eighth Annual Multiple Perspectives conference continues the university's efforts to bring together a diverse audience to explore disability as both an individual experience and social reality that cuts across typical divisions of education & employment; scholarship & service; business & government; race, gender & ethnicity. This year's theme 'looking back and thinking ahead' is meant to encourage presenters and participants to consider topics, methods and programs from fresh perspectives."

OVERSEAS

RAATE 2007 - November 26-27, 2007 | Sheffield, United Kingdom. "RAATE 2007 is the only UK conference focused on the latest innovations in Assistive Technology. This conference will be of interest to everyone who uses, works with, develops or conducts research on Assistive Technology (AT). The conference program has, over the past years, regularly included new technological developments, service innovations, results of formal research projects, service based research and development and a wide range of other stimulating topics. Known as a friendly and productive conference, RAATE offers you a chance to meet and share knowledge and experience with other people working in AT."

<http://www.raate.org.uk/about-raate/>

- ✿ **4th Cambridge Workshop on Universal Access and Assistive Technology** – April 13-16, 2008 | Cambridge, United Kingdom. "'Creating a better balance of work, living and leisure, for disability and ageing' The workshop theme 'Designing Inclusive Futures' reflects the need to explore the issues and practicalities of design that is intended to extend our active future lives in a coherent way. This encompasses design for inclusion: in the workplace; for businesses; for the individual and of products in these contexts."

<http://rehab-www.eng.cam.ac.uk/cwuaat/cwuaat08.htm>

Disability Studies Conference - September 2-4, 2008 | Lancaster University, United Kingdom. "The fourth international disability studies conference will take place at Lancaster University, UK. The purpose of the conference is to bring together researchers, practitioners, policy makers and activists to share and debate research, ideas and developments in disability studies. A call for papers and posters will be issued in January 2008. The closing date for abstracts will be 30th April. Submissions are particularly welcomed from students, activists and first time presenters, activists and first time presenters. We seek to provide a supportive environment for people making their first conference presentations and to be as accessible as possible to all delegates."

<http://www.gladnet.org/> (listed in the 'Events' section)

19th IAGG World Congress of Gerontology and Geriatrics - July 5-9, 2009 | Paris, France.

"Every four years, the World Congress of Gerontology and Geriatrics represents a unique and irreplaceable event attended by experts from around the world to discuss the latest findings in the field of ageing. The 19th congress, which is taking place in Paris in 2009, is particularly important, as it coincides with an ideological u-turn. Lifespan extension and the growing number of elderly people, once considered as catastrophic, are now viewed as an indisputable progress."

<http://www.gerontologyparis2009.com/site/view8.php>
